

TO: Residents

RE: SEVERE SNOW STORM POLICY

Not all information contained in this document will pertain to your property.

When access throughout the metro area is severely impacted, our snow vendors will experience issues going from one property to another. Once at a property, continuous snow fall and winds will negate most of the removal efforts.

Our vendors will do their best to keep up. For our private drive properties, we will get plows in to open drive lanes as soon as conditions allow. All properties will see additional services to ensure walks and drive lanes are cleared as soon as possible.

For our residents that need access to public streets, your HOA does not plow nor provide services for public streets. This service is provided by the municipality in which you resided. Contact your local public works department for updates regarding their public street plowing policy.

Thank you for your patience, and please, if possible, stay home. Let the crews have time and space to do their jobs.

SAFTETY ISSUES: Please notify us about any safety issues immediately!
